Brock University

Dennis Hull—A Composite  
of the Man  
Behind the Stats

**THE ALUMNI CENSUS—  
THE RESULTS  
ARE IN!**

## Buy a Brick ... to build a better Brock!

There are more than 105 names ready to be placed on bricks in a very special wall.

The wall will be in the lobby of the new Student Centre now under construction. The names belong to alumni who have generously donated at least \$250 each to help furnish the Centre. The bricks are Brock's way of showing our appreciation for generations to come.

Contact the Development Office of Brock University, (416) 688-5550 extension 3590, to make your donation.

Join your fellow alumni who are 'going to the wall' for their University... buy a brick for Brock!

# Are We At A Risk From Our Water?

Ian Brindle

In Medieval times, the alchemists searched for the alkahest, the universal solvent that would dissolve everything. What they did not realize was that this alkahest was all around them: water.

The water we drink in St. Catharines contains elements that derive from the rocks, over which the water flows, by the process of dissolution, aided to some extent by the carbon dioxide in the air. It is very important to realize that these processes have occurred for millions of years, long before people started to produce the chemicals that concern us now.

It is also important for us to understand the nature and extent of the pollution of our water and the extent to which we should concern ourselves with the removal or reduction of those chemicals that cause us such anxiety.

The water that we drink has been treated with chlorine to kill off pathogenic organisms in the raw water. These organisms derive from various animal and human sources and have been responsible for the

deaths of millions of people throughout the centuries and include typhoid and cholera. Of course we now understand the germ theory of disease so we can make informed decisions about the location of water intakes and treat our sewage. To protect us against infiltration in the event of a leak in the distribution system, our water is sterilized by the use of chlorine, a toxic and reactive gas which is slightly soluble in water.

Chlorine reacts with organic materials in the water to give rise to a class of compounds that have the collective name of trihalomethanes. Chloroform is a member of this class. This group is, generally speaking, highest in concentration of the

**“...we actually have a much greater exposure...not when we drink ...but when we shower.”**

compounds that cause us concern. Trihalomethane concentration usually reaches maximum levels in the late summer, as algae and other watery organisms increase the organic content of the water. Chloroform has been identified as a carcinogen, and so we feel concerned.

There are a number of things that we have to consider here. I feel that we actually have a much greater exposure to this chemical, not when we drink water (it has been estimated that we drink only 1.5 litres of water a day), but when we shower. Chloroform is a volatile compound; it will easily

transfer from the hot shower water into the air that we breathe. Also, chloroform can be absorbed through the skin. How many litres of water a minute do we use in a shower? What is a dangerous level of chloroform?

The pollution of the Great Lakes by foreign chemicals angers and upsets us. We have seen pictures of arctic terns with distorted bills, deformed fish from the lakes and ask ourselves, "Do I want to drink that stuff?" I feel that this is not the question we should ask ourselves. Fish live in it 24 hours a day; their skin is always bathed in it. The terns and gulls who eat the fish are magnifying the concentration of the toxins that

the fish have been absorbing during their lifetime. If we eat the fish from the lake, our bodies will absorb the toxins that the fish have accumulated and we will suffer the consequences of biomagnification. The risk that we experience as a result of drinking 1.5 litres a day of treated water from the Great Lakes I would consider to be insignificant. The risks of bottled water, I would hazard a guess, would not be better than the risk of tap water (consider the Perrier crisis of 1989).

In a small project that we performed at Brock two years ago, we showed that the hot taps in St. Catharines tended to

deliver water that was relatively high in lead. We felt that this was due, not to the quality of the water from the city, but from leaching of the lead solder around the fittings of the tap. We also showed that, if the water was allowed to run for a minute, this procedure would bring the lead levels down below the detection limit for our equipment. Lead is a very real problem and has been identified as a causative agent of impaired mental development in young children who have been exposed to low levels of lead in their diet.

Some feel that the purchase of a water treatment system, which fits on the tap, will solve all their problems, remove trihalo-methanes, chlorine, lead, PCBs, and the remaining alphabet soup of contaminants that we are told are in our water. We should beware of such claims. It is very difficult to remove very low levels of contaminants in water with small systems since an important factor in efficiency of removal is the length of time that the water is in contact with the treatment surface. For many systems, this contact time must be milliseconds where seconds, or even minutes, might be more appropriate. The danger with these systems, I feel, is that they make us feel invulnerable.

*Brock chemist Ian Brindle has recently been appointed to an independent advisory committee formed by the provincial government to set environmental standards. Five years ago he played a key role in the PCB leakage discovery in Smithville.*

BY IAN BRINDLE

## Brock Makes A Statement

An interview about Brock's Mission Statement, with Viki Soady, Senate Chair and member of the Planning Steering Committee

**Q** Why is Brock drafting a Mission Statement?

In November 1988 Brock University faced its 25th anniversary, no longer a small but now a mid-size institution, with a promise of prosperity reflected both in the new buildings going up on campus and in its fundraising climate. It seemed like the right time for Brock community members to devise an orderly plan by which the University might grow physically, academically and spiritually during the coming years.

**Q** How did you begin?

"The first step to wisdom," says the Delphic principle, "is to know thyself." Know where you are before you figure out where you are going. It is important in the midst of change not to lose the qualities that made this institution special and distinctive in the first place. So as part of the mission, the planning committee contacted the University's various stakeholders and long-term supporters: alumni, students, faculty, staff, board members, business and community groups and educators from the local secondary schools. Through questionnaires and group sessions, we tried to determine both their impressions of the University, and their notions of what they would like it to be. The University is grateful indeed to all who contributed to this exercise.

Viki Soady

**Q** What was the committee's response to these concerns? Can you summarize the Mission?

Highlights of the preliminary draft released to the University community March 1990 include a commitment to broadly-based liberal undergraduate education with an emphasis on small-group learning and an easy and open atmosphere of communication and accessibility between students and faculty. This was seen by all stakeholders as the cornerstone of Brock's distinctiveness as a university, along with respect for and value of the student as an individual. The Mission also projects new innovative programs and even some graduate programs, yet without losing small-group learning and strong undergraduate contact.

The Mission also promises to provide for its students extra-curricular activities and other experiences "designed to enrich their lives, develop their talents

**“It is the aim of Brock University to achieve national stature as a centre of teaching, research and creative activity.”**

*Brock Mission Statement.*

and provide opportunities to discover and pursue new interests.”

As an employer of 1,000 people, Brock has committed itself to leadership in equity for women and minorities, and fair and progressive employment policies for all. There was a strong feeling among stakeholders that the University should lead the rest of the community in these matters.

Brock will continue its commitment to seeking opportunities to serve as a learning, cultural, artistic and recreational centre for the local community, but is also thinking of itself as a citizen of the world.

**Q** What's the next step in the process?

Once the mission statement achieves its final form—probably mid-summer 1990, the next step in the process will be to refer clauses of the statement to appropriate presidential, senatorial and other

committees which will devise a plan for the next five to 10 years. Sometime during that period we will reassess and see how far we have come toward our mission and if indeed our mission is then the same as what we laid out five to 10 years before.

In practical terms, that means for example when a new program is proposed, Senate will be vigilant to ensure that it is not brought in at the expense of existing programs or of sacrificing other academic qualities described in the mission statement. Likewise, equity in hiring and fair employment practices will be addressed on each occasion in future personnel decisions. With respect to planning the physical shape of the campus, we will attend to the quality of student life and to our function as a resource centre for the Niagara Region.

The Mission Statement will serve to ensure that Brock will be able to meet the exciting challenges of the future while sustaining the institutional character and traditions which are manifest at its 25th Anniversary.

BY LEILA LUSTIG

# Dennis Hull—All-Star Alumnus

I had a preconceived notion of what Dennis Hull would be like.

After all, I had his stats. In his 15-year career, the left-winger scored 303 goals and had 351 assists. He made the NHL All-Star team for the '72-'73 season, and the same year played for Team Canada as they achieved their historic victory against the Soviets. In short, he was a hockey legend who helped establish the Hulls as the 'Royal Family' of professional hockey.

He is also a Brock graduate of the class of '81, with a BA in history. He attended the University after his retirement from professional hockey, when he was a good 15 years older than most other students.

In short, I was expecting a physically and emotionally intimidating man.

What I discovered was a man who is genuinely...nice. When you speak with Dennis Hull, it's easy to forget that he is a celebrity. Despite his 'star' status, Dennis Hull is modest about his accomplishments, down-to-earth, open and honest. He doesn't shirk the serious issues, yet he really comes alive when telling an amusing anecdote, and he sees a funny side to just about everything. It is no wonder that, apart from his other career interests, the former NHL All-Star has become a popular speaker at banquets.

## The Early Years

This casual, down-to-earth quality may be the product of his childhood years in Port Anne, just outside of Belleville, Ontario. Dennis Hull says that the town he grew up in is small. "There's only one road in...and then you're stuck there!"

Dennis Hull

There were 11 kids in his family: eight sisters and three brothers including the 'Golden Jet', Bobby Hull.

Dennis Hull says that his family is very close. All 11 kids played hockey together—the girls included. In fact, this All-Star says that if women were allowed to play professional hockey, a couple of his sisters would probably have made it to the NHL.

The warm affection in his voice when he says this seems to indicate a happy childhood, although he did mention one disadvantage of coming from a large family.

It may surprise some of Dennis Hull's fans, but this big, burly hockey player spent a lot of his childhood in 'drag'. He laughs about it now. "When you come from a family of 11, you just get what's handed down." He says he was so used to wearing his sisters' hand-me-downs that when he got a new coat—a boy's coat—he would try to button it the wrong way. "I still—when I'm in a hurry now—I still try and button it the other way!"

Even when he played hockey his sisters left their mark on him. "The first time Joe Namath played they made a whole big deal about his wearing white football shoes...he was the first person ever to play in them. Man! I was wearing white skates in 1950!"

## 'Bobby Hull's Brother'

When Dennis Hull joined the Chicago Black Hawks in 1964, his older brother Bobby was already a star. Following in his brother's footsteps meant that Dennis was often in Bobby's shadow. It was inevitable that comparisons would be made. It also seems inevitable that Dennis would resent this. He dispels that misconception immediately. "Whatever people say has no bearing at all, especially as a professional athlete; you're playing for your coach and your team-mates, and as long as they're happy with what you're doing, then that's all that counts."

Now that the Hulls have produced a second-generation NHL star, Bobby's son Brett,

the comparisons are happening all over again. Dennis Hull says that Brett is handling it even better than he did himself. "One of the things he has going for him is that he's been 'Bobby Hull's son' all his life. I didn't become 'Bobby Hull's brother', or called that, until I was 21." Dennis Hull says that, like any family, he and Brett Hull are simply proud of their relative's accomplishments. "What are you supposed to say, 'What a rotten guy you are for being so good and making us look bad'? Of course not!"

When asked to identify the most memorable event in his outstanding hockey career, Dennis Hull shows no hesitation. He smiles as he remembers. "Playing for Canada in '72. It's great to play for a city, like Chicago, but you're only representing so many people. When you play for your country you're representing 25 million people; that's a real thrill."

## From A Black Hawk To A Red Wing

Despite all the interviews Dennis Hull has given, there are still stories the public hasn't heard. One of these involves the move from the Chicago Black Hawks to the Detroit Red Wings.

After 14 seasons with Chicago, the team signed on a new manager and coach who proceeded to replace established players with his own people. The left-winger decided that this was the incentive he needed to retire. "I knew I had lost the desire to play."

Just as he was about to hang up his skates, he received a call

from Ted Lindsey, the manager of the Detroit Red Wings. Lindsey asked Hull to play a season for Detroit. The only reason Dennis Hull agreed was because of something Ted Lindsey had done many years before.

Back in 1957, Dennis Hull's mother was badly burned in a boating accident, and was hospitalized. Twelve-year-old Dennis Hull would visit his mother regularly. "One day at the hospital in Belleville there was a red '57 Thunderbird convertible; I

spent about an hour looking at this car." The convertible carried Michigan license plates, and when the young Hull entered the hospital room, there was the owner of that incredible automobile. "It was Ted Lindsey. He didn't know the Hulls at all. He read about [the accident] in the paper, and he drove from Detroit to see her."

The impression this surprise visit made stayed with the left-winger. "So when he said 'Come and play for Detroit'...what are you going to do!"

## The Brock Student

When he retired from hockey in 1978, at the age of 34, Dennis Hull decided to attend university. He says the desire for further education developed, in part, because playing for the NHL wasted so much of his time.

Hull explains that unlike the glamorous life many people envision, professional hockey entails a lot of waiting around in hotel rooms. "When you go somewhere—if you go to New

York—you're not allowed to go to the theatre, you're not allowed to do anything. You're focused completely on the game."

This particular player filled the empty hours with books, and the amount of reading he did created the desire for even more knowledge.

He says he chose Brock because he and his wife were homesick. Dennis Hull lived in St. Catharines when he played for the Black Hawk farm team, and his wife is a native of the city.

plumber, come to fix his sink!" The celebrity laughs. "And that's how my career started at Brock."

Although he still turned heads among the student body, some of the professors seemed immune to the hockey player's fame. Dennis Hull appears to have a deep respect for his professors, and mentions how pleased he was to receive a Christmas gift from his wife—a book written by one of his history professors. One day after class he asked him to autograph the volume. The professor

the angle and projection of the ball!"

The former All-Star is now the Director of Special Athletic Programs for the Institute. But Dennis Hull doesn't stand still for long. His other career interests include part-ownership of Rose City Chrysler in Welland, and he travels around the States and Canada speaking at banquets. Ask him about his schedule for the next week, and it might include appearing in a parade in Niagara, heading out to B.C. to speak at a banquet, then jetting off to Italy to visit

his son.

Unlike many celebrities, Dennis Hull has been happily married for 25 years to his 'high school sweetheart', Mary-Sue Newman (Newman Steel)—the 'girl next door' who lived just down the street when he played for the St. Catharines Black Hawks. He has a son, John, who lives in Europe, and a daughter, Martha, who graduated from Boston College with a major in art history, and now works in a bank in the same city.

Although Dennis Hull has only two children, his brothers and sisters have kept the large-family tradition alive. The hockey player has a total of 35 nieces and nephews. He says that they have all stayed fairly close over the years, and still get together for a big July first family picnic.

Family man. Left-winger. Educator. Coach. Entrepreneur. It's almost impossible to put a label on Dennis Hull; to sum him up in a single word or a phrase. Almost impossible. There is one phrase that exemplifies the man's career, his strength, his warmth and humour: 'All-Star'.

DIVINO MUCCIANTE

“[the professor] thought I was the plumber, come to fix his sink!”

agreed, and with pen poised, turned to Hull. "He said 'Let me personalize this...what's your name?!'"

## Dennis Hull Today

Dennis Hull taught Canadian History at Ridley College, where he also coached part-time during the school term and established the private school's summer hockey camp.

Family man. Left-winger. Educator. Coach. Entrepreneur. It's almost impossible to put a label on Dennis Hull; to sum him up in a single word or a phrase. Almost impossible. There is one phrase that exemplifies the man's career, his strength, his warmth and humour: 'All-Star'.

BY KATHLEEN LEGGAT

# Alumni Census—The Results Are In!

*The Census results are in—now we have a clearer idea of who you are!*

**W**e have been inputting and tabulating the information since August, and now we can share some of our findings. The next few pages include some charts and graphs, some trivia...even a quotation or two. Compare yourself to the average graduate, see where your fellow classmates have gone, and discover some very surprising facts about Brock alumni.

Our figures are based on the responses we received—5,143. The response rate was 32%—a very good return by census standards. But there is still room for improvement! If you misplaced or didn't even receive your census form, just contact Alumni Affairs and we'll drop one in the mail.

Now that we have the results tabulated, we'll keep it going. We plan to give a census form to all new graduates of Brock, and conduct a new mass census in about five years.

We can use this information in many ways. Perhaps the most important to you is to organize Alumni socials, academic events and career workshops that are targeted for specific interest groups and geographic locations.

## Look Who's Talking

The response rate was fairly even, but females edged out the males 53-47%. Of those females, the highest response rates came from those who hold BPhEd, BRLS, BAdmin or MEd degrees. Our highest male response rates came from those who hold B-Admin degrees.

Who are the quiet ones? We had the fewest responses from females who hold BBE or BEd degrees, and males who hold BEd, BPhEd and BBE degrees.

## TRIVIA

There are 1,666 Brock alumni who have a BEd plus one other Brock degree.

Of the alumni who responded, 392 were on the rowing team.

There is a total of 1,156 alumni with at least one relative who also attended Brock.

## Your Age

Most of the alumni who responded to our census were between the ages of 26 and 45, with 45% of you in the 26-35 range, and 34% from 36 to 45.

## In Requiem

Sadly, 71 of our fellow alumni have died.

## PAY EQUITY?

Yearly Earnings (\$)	Female Alumni	Male Alumni
- 20,000	277	102
20-30,000	181	90
30-40,000	201	158
40-50,000	159	179
50-60,000	138	188
60-100,000	32	120
100-150,000	4	21
150,000 +	1	5

## EMPLOYMENT RECORDS

Status	Female	Male
Employed full-time	1722	1587
Employed part-time	283	41
Self-employed	130	197
Homemaker	155	1
Student	116	104
Retired	57	32
Unemployed	29	15

## WHERE THERE'S A WILL...

We were interested to learn that 40 alumni have included Brock University in their will, and 13 others have made Brock a beneficiary of their insurance. There are 2 alumni leaving special collections to the University, and an alumnus is considering a scholarship fund.

## "HOW TACKY!"

"I am insulted." "You got to be out of your mind!!"

These were the responses of a few alumni (11 out of 5,143) who were upset by the will, life insurance and personal income questions.

For those who were offended, Alumni Affairs would like to remind you that if you have an objection to any question on our census, you are free to leave it blank.

Although the information helps us learn more about our alumni, we don't want to alienate anyone!

## TWO PAYCHEQUES ARE BETTER THAN ONE

Double income families are the rule, rather than the exception. Of our alumni who graduated between '64 to '69, a whopping 84% enjoy a double income. The percentage drops for graduates of the '70s, settling at 78%, then jumps back to 84% for those who graduated in the '80s.

## PASSPORT, PLEASE!

Of those of you who answered our census, a total of 879 are living outside of Canada, in 72 different countries. The U.S. was your first choice as a place to live, followed by the Far East. Here's a partial list of where you're living now:

U.S.A.	249
Malaysia	134
Hong Kong	121
Singapore	66
West Germany	39
Trinidad/Tobago	30
England	29
Tanzania	25
Australia	16
India	9
Kenya	9
Greece	8
Cayman Islands	7
Nigeria	7
New Zealand	6
Bangladesh	6
Scotland	5
Bahamas	5
Italy	4
France	4
Grenada	3

## AGES AND WAGES

Of the respondents, 11% claimed a personal income of \$60,000 a year or higher, and 2% claimed a household income of more than \$100,000. Here's where the majority of Brock graduates stand:

Grad Year	Personal Income (in thousands of dollars)			
	40-50	50-60	60-100	100 +
'64-'69	11%	38%	19%	—
'70-'74	18.3%	32.5%	16.5%	5%
'75-'79	25.5%	28%	12%	3%
'80-'84	23.8%	19%	8%	1%
'85-'89	13%	10.6%	4%	1%
Total	19%	19.5%	9%	2%

## Alumni Census (cont.)

### Getting Involved

Many of you expressed interest in starting new Alumni Association chapters in your home towns, or in looking up your old classmates (particularly in Montreal). Be assured that Brock's Alumni Affairs office will make every effort to keep you in touch!

### Family Life

There are 650 Brock grads married to other Brock grads.

In total, 2,161 alumni have created 4,396 children...an average of 2 per family.

Of these children, 250 are 16 or 17 years old. (Have they applied to Brock yet?)

## BY DEGREES

There have been 20,644 degrees awarded by Brock University—11,148 (54%) to females and 9,496 (46%) to males. Here's what you received:

Percentage of total degrees to:	Female	Male
<b>DEGREE</b>		
BA	50	43
BSc	5	15
BEEd	26	14
BPhEd	5	5
BRLS	1.5	1
BAdmin	3	7
BBE	1	3
MA	.5	1
MSc	.5	2
MEd	6	8

Males earned the most BSc degrees, picking up 72% of the degrees awarded. Other male-dominated degrees include MSc (82%), BBE (69%), MA (69%) and BAdmin (64%). Female-dominated degrees include BRLS (70%), BEEd (68%), and BA (58%). BPhEd and MEd degrees were distributed fairly evenly between the sexes.

## CAREER CHOICES

The highest percentage of alumni who responded are involved in the teaching field, regardless of what degree they received.

**BA**—The highest percentage of BA recipients, both male and female, chose the teaching profession: 26.5% of males and 48.5% of females.

**BSc**—Here the sexes differ; males with a degree in science tend toward computer science careers, while females tend toward teaching.

**BEEd/MEd**—No surprises here! Most males and females with a degree in education are teachers (77.5%).

**BRLS**—Males with this degree seem to split evenly between careers in health care, government and other professions. Females tend toward careers in other areas.

**BBE**—Males are evenly split between accounting and business careers, while the majority of females chose accounting.

**BPhEd**—Once again, an overwhelming majority chose the teaching profession, regardless of gender.

**BAdmin**—Accounting was again the first choice, with 48% of male degree-holders and 51% of female degree-holders choosing this field.

## An Update From The Alumni President

**Dave Betzner**

(notice a theme starting here?) will put your name on the donor wall.

Our Silver Anniversary float in the Grape & Wine Festival Parade was a big hit—but not as big as The Nylons at Homecoming! Over 500 alumni showed up to see the a cappella singing group...and each other.

Our affinity card program has been a hot item! Over 1,000 cards have been distributed since we first introduced it. The affinity card offers special perks to users, and a percentage of every purchase is returned to Brock...compliments of the Bank of Montreal.

Last fall we sent out new Alumni Association membership cards. The card gives you library access and other special privileges, so if you didn't get it, give us a call.

By the way, thanks for the phenomenal response to our surveys. We're busy updating our records now.

Here are two dates to mark down on your calendar: Sept. 29th for our annual Grape and Wine Activities, and Nov. 2 & 3 for our Homecoming.

Finally, we are always looking for volunteers. Why not help us out? Just call Mike Somerville at the Alumni Office, 688-5550, ext. 3251.

Have a nice summer, and we'll see you in the fall!

David Betzner  
President Alumni Association

## 1971

**Anton Kuhn** (BA, hist) announces the birth of his son, Alexander, on Nov. 8, 1988. Anton lives in Surrey, B.C. where he is a supervisor for Transport Canada.

**David Mapstone** (BA, geog) received his MEd from the U of T in 1978 and has just been promoted to principal of Castlemore P.S. in Brampton. He is married and has a 9-year-old daughter. David would like to hear from Gray Gillespie of the Class of '71.

## 1972

**J. Douglas Barbeau** (BA, psyc) and his wife Elizabeth have five daughters and one son, ranging in age from 2 to 16. Douglas works for General Motors of Canada in Calgary, Alberta.

**Bob Cretney** (BA, poli) is a teacher with the Lincoln County Board, where he teaches grades 4 - 6 physical education and grade 11 night school history. He and his wife Cathie have three children, Lynn (18), Brian (15) and Joanna (12).

## 1973

**Doug Martindale** (BA, clas) is concluding his 10th year at North End Community Ministry in Winnipeg, where he is a social justice animator. In his spare time he teaches a course in social work at the University of Manitoba.

## 1974

**Keith A. Busby** (BA, psyc) is a PhD working as a research psychologist at Ottawa General Hospital. He and his wife **Janet (Beam) Busby** (BA, psyc '73; BEd '74) have a baby girl, Alysha Claire, born March 19, 1990 and a son, Jonathan Kyle William, born July 28, 1987.

**Peter Dyck** (BA, soci) is the staff chaplain at Carle Foundation Hospital in Champaign, Illinois. He is working in the area of chemical dependency and psychiatric treatment for in- and out-patients on the adult and adolescent levels.

**Jan Gardiner** (BA, dram/psyc) and her husband Dr. Bruce Williams announce the birth of Timothy on Nov. 25, 1989, a brother for Dorothy (9), Katharine (6) and Teddy (4). The family lives in Willowdale.

**Doug Wighton** (BA, geog/hist) announces the birth of his second daughter, Stephanie Lauren, born Sept. 13, 1989. He says the baby is 'a wonderful toy' for her sister, Victoria. Doug resides in Mississauga.

**Bob Cretney, BA '72**

## Alumnews (cont.)

### 1975

**Wally Brault** (BA, geog/uest) and his wife **Karen Peters** (BA, econ '75) announce the birth of twin girls on June 15, 1989. Wally, who earned his MA, was a planner for six years, and now practises law at the West Coast Environmental Law Assoc. in Vancouver, B.C. Karen has her MSc, and worked at the Dept. of Finance in Ottawa as an agricultural economist before joining Agriculture Canada.

**Catharine (Archer) Feldman** (BA, soci) has been living in Switzerland since 1984, with her husband Michael and two young children. She has re-entered the workforce as a social worker, and counsels in French—a language she has only learned since moving to Europe!

**Janet A. A. (Rossi) Hymers** (BA, psyc/phil) lives in Kent,

England, and works for the local government as a planning assistant in Technical Services.

**Mark Stevenson** (BA, geog/uest) and his wife Diane have a daughter, Erin Leigh, born in 1987. Mark received his MSc in 1978, and established two consulting companies last year in Toronto —Mark A. Stevenson Planning Consultants and Prosemaesters-Writing & Editing.

### 1976

**Sue (Diamond) Gardner** (BPhEd, psyc) earned a BED at Queen's, then a MEd at the University of San Diego. Sue is a guidance counselor/academic resource teacher for the Durham Board, and she and her husband are restoring a historic Victorian home in Port Hope.

**Mary Kebalo-Plata** (BPhEd) received her MEd from Western in Oct. 1989. She and her husband live in London, and Mary freelances for TV Ontario.

### 1977

**Lorri (Metcalf) Moffatt** (BPhEd) is teaching part-time primary music and physical education for the Dufferin-Peel R.C.S.S.B. She and her husband live in Oakville with their three children, Allison (6), Bryan

(3) and new baby, Jordan Patrick.

### 1978

**Lu Cekota** (BED) and his wife **Anne (Folusewych) Cekota** (BPhEd '80) have two sons, Chris (7) and Jeff (5). Lu is a special education teacher with the Dufferin-Peel Board, and Anne is a teacher with the Halton R.C.S.S.B. in Oakville.

**Barbara (Guyatt) Hodgins** (BA, geog) married her husband Tom in '86. She

## BADGER STATS

**Tennis**—a gold in the Ontario University Athletic Association (OUAA) Doubles

**Rowing**—a gold at the Ontario Women's Interuniversity Athletic Association (OWIAA) Finals

**Fencing**—Women's Foil OWIAA gold medal

**Lacrosse**—the Ontario Club Team Championship

**Women's Volleyball**—first in OWIAA West and a bronze at the Championships

**Men's Wrestling**—5th in the OUAA, five medals at the Championships (two golds)

**Women's Basketball**—consolation champs at OWIAA Finals

**Men's Basketball**—semi-finalists in OUAA West

**Men's Hockey**—quarter-finalists in OUAA West

**Swimming**—18 medals (nine gold) at the Championships, women's 5th in the OWIAA, men's 7th in the OUAA

**All-Stars**—10 Badgers were named OUAA or OWIAA All-Stars during the 1989-90 season

We have a date for you to remember—September 29, 1990. That's the day of the Grape & Wine Festival Parade, and, as usual, we'll have special on-campus alumni events. Thanks to the Homecoming Committee for designing and building last year's float, our 25th birthday 'cake', and to the following donors for financing it: the Brock University Students' Union, Van Egmand Construction Ltd. for the building materials, STANPAC for the decorating materials, Niagara Relocatable Buildings Ltd. for the tractor/trailer and driver, and Kelsey-Hayes for the storage facilities.

## WE'RE BOOKED!

### Homecoming Weekend

NOV. 2 & 3

- live concert Saturday night
- Pat Hewitt in *Alphie's* all weekend
- non-stop events
- the chance to meet old friends

Mark it down...  
you don't want to miss it!

**Donna Skinner-Johnson** (BPhEd '79; BED) and her husband **Douglas Johnson** (BPhEd '80; BED '81; MED '85) have a young son, Jordan. Donna teaches grade 6 with the Waterloo County Board, and Doug teaches grade 7 with the Wentworth County Board.

### 1981

**Elizabeth (Mitchell) Carter** (BA, Fren/Germ) and her husband **Ian Carter** (BSc, biol/chem '81; MSc, chem '84) announce the birth of Andrew Robert Marshall on Sept. 19, 1989. Liz says she would 'love to hear from the Medieval French Gang!' **John T. Guilfoyle** (MEd) has been elected to a three-year term on the Board of Governors of Mohawk College. John has worked at Mohawk for 13 years, most recently as associate director, Physical Resources Division.

### 1982

**Heather Bailey-Lamoureux** (BA, dram) was married in

worked her way up in the Region of Durham to become the senior planner in the Current Operations Branch. **Doug Jarvie** (BA, psyc/soci) and his wife Kim have two young daughters, Laurel (22 mos) and Amelia (5 mos). Doug is with Via Rail in Windsor.

**Jim Louter** (BSc, biol) and his wife **Marisa Romano** have a son, Matteo James, born Aug. 14, 1989. The family lives in Guelph.

**Susan (Davies) Maceyovski** (BA, geog) and her husband **Karl** have a new son. **Keith James**, born Oct. 11, 1989, is the little brother of **Laura** (4). They reside in Leduc, Quebec.

### 1979

**Alan Young** (BED) and wife **Laura's** second child, **Jessica Eileen**, was born on March 15. Alan works for a law firm involved in a business-government exchange program that will place him at the Department of Finance in Ottawa as a special advisor on federal-provincial relations.

### 1980

**Judy (Brunskill) Dodsworth** (BPhEd) lives in Alberta with her husband and four children, Jennifer (7), Ben (5), Eric (3) and Scott (2). **Shelley (White) Hanson** (BA, Fren/Germ) and her husband **Harris** would like to announce the birth of their fourth child, **Mark Austin**, in Feb. 1990. The family lives in Calgary.

**Loukritia Prattas** (BED) is married to Dr. Ted Tzalis, and is a teacher of adult day school in Toronto.

### 1983

**Randy Maass** (BSc, geol) is still single, and works at Granges Inc. in Timmins as a project geologist.

They just celebrated the fourth anniversary of their company, Accent Fashion Accessories in Hamilton, which now employs six people. **B.J. Valencia** (BA, psyc) is a division sales manager for Kobrand Corp., a national importing company in New York City that specializes in fine wines.

### 1984

**Mark Green** (BAdmin/poli) was married in Sept. 1989, and is currently supervisor of securities lending for Canada Trust in Toronto. He would like to hear from

Sue Gardner, BPhEd '76

*the friends of Sean O'Sullivan*  
IN TRIBUTE TO A GREAT CANADIAN

*"Few of those professors could ever have foreseen the legacy of achievement that would belong to Brock University in such a short time. They were willing to risk; to sacrifice; to pursue the dream we call Brock University. Today I join you in recognizing those founders whose foresight and dedication have made Brock a special home to over 10,000 graduates from all parts of the world."*

-Sean O'Sullivan,  
June 7, 1985

Sean O'Sullivan, the only Brock alumnus to receive the University's honorary degree, died one year ago after his battle with cancer. He was 37. He had been both elected to the House of Commons (while completing his degree part-time, therefore Prof. Matheson's telegram: "Congratulations. Where is your paper?"), and ordained a priest in the Catholic Church. Sean O'Sullivan touched many lives through an eclectic range of charged interests.

Today business, church and political leaders, including Prime Minister Brian Mulroney, *Toronto Sun* Chairman Doug Creighton and His Eminence G. Emmett Carter, serve as patrons of a campaign to establish an enduring memorial to Sean O'Sullivan. The wishes of the family dictate that Brock University will be the beneficiary of the efforts of The Friends of Sean O'Sullivan.

Through the campaign's proceeds, a number of Sean O'Sullivan scholarships will be created with terms negotiated with the donor. The Sean O'Sullivan Centre for Teaching and Learning will help professors enhance teaching skills. Financing will be completed for the Student Centre, in return for which the Brock University Students' Union will name the building in his honour.

For more information about this tribute to a great Canadian, contact the Office of External Relations.

David Brain and John Timms.  
**Matthew Hill** (BSc, cose) recently moved to Calgary to accept the position of software design engineer with Novatel Communications Ltd.  
**Linda Whiting** (BEd) is a teacher of the hearing impaired for the Durham Region R.C.S.S.B. in Oshawa.

1985

**Rosamund (Swale) Battye** (BA, psyc) has returned to Brock as BSc coordinator for non-academic child studies. She is finishing her MEd, is a part-time teaching assistant and is proud that her eldest son Robin is 'keeping Brock in the family' as a second-year student.

**John A. Bergen** (BA, comm) and his wife Deborah have a new son, Andrew Davis. John is a senior proposal analyst at Babcock & Wilcox International in Cambridge.  
**Britt Fisher** (BA, adm/soci) married Marie Attolino on April 29, 1989. He is teaching for the Welland County R.C.S.S.B., and is attending the U of T Faculty of Education (tech. studies).

**Karen (Rollason) Hartai** (BEd) and her husband **Steve Hartai** (BPhEd '85, BEd '86) have a baby girl, Natalie Karen, born on Oct. 5, 1989. The couple lives in Chatham.

**Shaheer Hasan Khan** (MSc, chem) and his wife Humaira have a baby boy, Muneeb, born Sept. 89. They live in Buffalo, N.Y., where Shaheer is involved in cancer research.

**Deena (Collier) MacDonald** (BA, psyc/Engl) married Thomas MacDonald in 1986, and has a son, Brent, born Sept. 1, 1989. Deena is a counsellor for the St. Catharines Association For Community Living.  
**Joanne (Voisin) Paige** (BAActg) is married, and is the manager of RME Capital Corp. in North Bay.  
**Ann Tyers** (BPhEd '82; BA, psyc '83; BEd) is pioneering the Ministry of Education off-campus Transition-Community Living Program for young deaf-blind adults in Brantford.

1986

**Don Boswell** (MA, poli) graduated from the Legal Assistant Certificate Program at Fanshawe College, and is now working for the Department of Indian Affairs in Ottawa.

**Rae (Murray) Catella** (BSc, biol '84; BEd) is married and has a daughter, Krista, born March 25, 1989. Rae is a part-time biology lab teacher at Brock.

**Daryl Clancy** (BBA) married Laura Ervin on March 10, 1990. Daryl is national product manager of TNT Air Express in Mississauga.

**Brian Scott Edward Cline** (BA, hist) recently married his 'Alabama Sweetheart', Sharon Gossett, and moved to the deep south.

**Mark P. Dreschel** (BA, hist) received his MA in American foreign policy from Queen's in 1988 and is currently working as a recruitment support specialist for Workers' Compensation in Toronto.

**Claudia (Pade) Hughes** (BA/BEd) and her husband Bill gave birth to a daughter, Jessica Lynn, on March 19, 1990. Claudia is a grade 2 teacher for Pontiac City Schools in Michigan.  
**Charlie Hyndman** (BA, econ) was recently transferred and promoted from the St. Catharines Engine Plant of General Motors to the Scarborough Van Plant. Charlie is superintendent of manufacturing.

**Diane (Coville) Noe** (BA, Fren) completed her BComm at the University of Ottawa in April 1990. She married Andreas Noe in August 1988, and the couple lives in Gloucester.

**Lory Darleen Porter** (BLRS) has recently joined the Recreation Department at Toronto's Bloorview Children's Hospital.

**Susan (Carbone) Waters** (BA, geog) is a management trainee for the Canadian Imperial Bank of Commerce in Burlington.

1987

**Jamie Almas** (BA, poli) attended Windsor Law School after graduation, and has just accepted a position with Heelis, Williams, Little & Culliton in St. Catharines.  
**Debbie Armstrong** (BBE) has been promoted to property assessor with the Ministry of Revenue in Toronto.

**Yolande C. (Moody) Bissonnette** (BA, Fren) works for Niagara College as coordinator of office administration. She has her Certified Professional Secretary Designation and has received a special Staff Recognition Award.

**Danette Blue** (BA, soci) completed her Master's in social work at Laurier in the fall 1989, and now works for Community Services at the Huronia Regional Centre in Orillia. She would like to say 'hello' to her Brock friends and professors.

**Lynn (Chapman) Calvert** (BA, chst) married Andy Calvert after graduation and has a young daughter. The family lives in Hamilton.

**Don Cressman** (BAdmin) married his wife Becky Bailey on April 22, 1989. Don is a landscape technician for Cressman Tree Maintenance and Landscaping Ltd. in Cobourg.

**William J. Haines** (BAdmin) graduated from York University with his MBA in 1989. He joined the Royal Bank the same year as a trader in investment banking and treasury.

**Antonette Iudiciani** (BSc, biol) holds the position of lands and waters resources technician at the Ministry of Natural Resources, located in Fonthill.

**Ron Muckenheim** (BA, psyc) will be teaching elementary school in Durham County starting in the fall.

**Stephen J. Sheppard** (BA, Engl '86; BEd) married Nancy Lawrence (BA, Engl '87) on Aug. 22, 1987.

Nancy is the lifestyle editor for the St. Thomas Times Journal, and Stephen teaches English and art. Their son, Samuel Grant, was born Aug. 23, 1989, weighing 8 lbs, 15 oz.

**Anna May (Copelin) Smith** (BA/BEd, chst) married **Arthur Gordon Smith** (BAdmin '84) on Dec. 16, 1989. Art is an accountant in Hamilton, and Anna is teaching kindergarten for the Halton R.C.S.S.B. in Oakville.

**Shelley Smith** (BEd) is a special education teacher for the Dufferin-Peel R.C.S.S.B. in Mississauga.

**Paul J. Stephenson** (MEd) and his wife Jennifer are expecting a sibling for their 3-year-old daughter, Sarah. The family will be moving to Barrie soon.

**Shoshana Tyson** (BA, fine arts) has started her own business in Fonthill, Shoshana Designs Inc., making handpainted silk jewellery.

**Gregory Whelan** (BA, soci/psyc) is the executive director of Big Brothers of South Niagara. Greg is working on a recruitment video, and says they need 24 new Big Brothers.

**Kevin M. Zimic** (BAdmin, mktg/econ) is owner relations analyst/specialist at Ford Motor Co. in Oakville. He is currently racing a showroom stock car in the Honda-Michelin Challenge with **Steven Champion** (BAdmin '88).

1988

**Betty (Conklin) Baxter** (BSc, cose) married **Ian Baxter** (BSc, cose '86) on Sept. 2, 1989. The couple has moved into their new house in East Oshawa.

**Pamela Brown** (BPhEd) graduated from Teacher's College last year, and is presently teaching in Mississauga with the Peel Board of Education.

**Karen (Brown) Dockeraey** (BRLS) married **Jeff Dockeraey** (BRLS '87) on October 28, 1989 and the couple lives in a country home just outside Thunder Bay. She wants to thank the gang at Alphie's for the wedding gift.

Over 120 grads showed up at the Ontario Science Centre for an informal wine and cheese reception on February 21, 1990. The next Toronto event will be a family picnic on Centre Island in late July or early August—watch for the details in the mail.

## Alumnews (cont.)

### DIAL B.R.O.C.K. ANYTIME!

Even in Toronto, you can get the latest alumni news, local events and Badger sports scores—toll-free—just by dialing **B.R.O.C.K.!**

Just dial **925-2929** from your touch-tone phone, wait for a response, then dial 2 followed by **B.R.O.C.K. (27625)**. (In Niagara, dial **688-5550**, and the call directory will tell you more.)

*It's a great way to keep in touch...just by using your touch-tone phone!*

**Cathy Ferguson** (BRLS) announces her engagement to **Adam Axcell** (BAdmin '87). The wedding is set for October this year. Cathy has recently become the operations supervisor for Tour of the Universe in Toronto.

**Belinda Joyce Geoghegan** (BA, soci) is presently working in the Brock library at the circulation desk. She is engaged to **Patrick Shane McCauley** (BA, soci '89).

**Larry Horeczy** (BA, psyc) started working for the Alberta Family & Social Services last Aug., as an adoption worker and foster care liaison. He lives in High Level, Alberta with his wife Pearl, and says that he is enjoying the far north!

### 1989

**Denise Bartko** (BRLS) has begun a new career as a flight attendant with Canada

3000 Airlines. Denise lives in Barrie.

**Bruce William Bates** (BPhEd, '87; BA, psyc) is working at Brock as research coordinator for Neuroscience Imaging Research. He has just

returned from presenting his undergraduate thesis at the Society for Neuroscience convention in Phoenix, Arizona.

**Bruce** will be attending graduate school this fall.

**Janice Elms** (BA, psyc) has just returned from travelling through Australia for the past seven months.

**Christine "Kris" Frommhold** (BA, psyc) is proud to announce the birth of her daughter Natalie Jane, born Sept. 19, 1989. Kris lives in London, where she is a research assistant in Victoria Hospital's Department of Psychiatry.

**Elizabeth Anne "Lizanne" (Ross) Harvey** (BEd) and her husband Don have a new

baby boy, Donald Evan Ross, born July 21, 1989. They live in Mississauga.

**Sandra Heaslip** (BRLS) received her post-graduate degree from Georgian College in recreation for special populations. She is currently doing placement at the Elgin/Middlesex Detention Centre in London.

**Christine Heath** (TESL) graduated from U of T with a BEd in primary/junior education.

**Joan Carol (Anderson) Kott** (MEd) is a grades 4/5 teacher with the Wentworth County Board. She is happily married and has two sons, Michael and Jeremy. She raises, shows and trains Alaskan Malamutes.

**Glenn Richard Lindsey** (MEd) is a technical trainer with Northern Telecom Canada in Nepean. He is the president of the Ottawa Chapter of the Ontario Society for Training and Development (OSTD).

**Sandra Malik** (BEd) is a kindergarten teacher with the North York Board of Education, and is expecting her first child in October. She would like Suzie to tell her what happened to the Group Eight newsletter.

**Michael Mamo** (BA, soci) is completing his Masters in sociology at Queen's, and says he misses Brock.

**Kirk "Chip" Merrett** (BBE) is moving to Toronto for his new job as internal auditor for The Bay, Simpsons & Zellers.

**Caroline Rouse** (BEd) is an elementary teacher with the Toronto Metropolitan R.C.S.S. Board.

**Kathy Saso** (BPhEd '88; BEd) will marry **John Lott** (BEd '83) on July 21, 1990 in Markham. Kathy is a grades 7 & 8 teacher for the Scarborough Board, and John is production supervisor for Chrysler in Brampton.

**Shelley (Dobson) Shongut** (BRLS) is pleased to announce her marriage to Robert Shongut, August 19 in Brampton. Shelley is a recreation therapist at I.G.H.L. Day Treatment Centre in Southampton, New York.

**Georgina Simpson-Robilard** (BA, chst '86; BA, psyc '88; BEd) was married Oct. 8, 1989 and teaches grade 4/5 with the Wentworth County Board of Education.

**Julie Tricarico** (MA, poja) completed her BEd at Queen's and is currently in first year law at the University of Windsor.

### IN MEMORIAM

Gregory David Sibbick (MA, poli '86) lost his life in a traffic accident on Sept. 29, 1989. His wife, Frances, is recovering from injuries sustained in the accident, which occurred while the couple was vacationing in the U.S. Gregory was employed with the Ministry of the Attorney General in Toronto, as a planning officer with the Courts Administration Branch. He is sadly missed by his wife, their son Benjamin, his parents Ross and Leila, and his brother Lealand.

# Brock Briefs

## 1st Brock Pres. Educator Of The Year!

Brock's President Emeritus, Dr. James A. Gibson, was honoured with the title of Ontario Educator of the Year for 1990 at a recent ceremony in Quebec, presented by Les Productions Québécoises Pro-Art Inc. Dr. Gibson was awarded the medallion of the Prix du Mérite Canadien "Jeunesse Education" (Canadian "Youth Education" Excellence Prize), for his "unparalleled efforts both provincially and nationally for the youth of Canada."

## Professors

**Prof. Carl Baar** of the Politics Department is one of a five-member team that has secured a SSHRC grant to study the Canadian courts of appeal. Prof. Baar will work with three colleagues from York and one from the University of Lethbridge, to study the 10 provincial courts of appeal, with some attention to the territorial and federal courts of appeal as well.

**Prof. Ian Brindle** of the Chemistry Department has been appointed by the provincial government to an independent advisory committee that will set environmental standards. The committee consists of 11 other scientific and environmental experts, and will, with public input, recommend standards and guidelines to regulate contaminants discharged in our water, soil and atmosphere.

**Prof. Mike Dickman** of the Biological Sciences Department has been appointed by the Lieutenant-Governor of Ontario to the Environmental Appeal Board. The Board will consider arguments from industries and other parties seeking to appeal a pollution control order. Prof. Dickman explains that environmental cases have grown so complex that now environmental scientists are as necessary as the lawyers on the Board.

**Prof. John Jackson** will write a history of the City of St. Catharines with Sheila Wilson, former chief of the reference section of the city's Centennial Library. The book was commissioned by *The St. Catharines Standard* as part of the newspaper's centennial celebrations.

For the 400-page illustrated history, the authors will draw information and photographs from *The Standard* as well as Brock's Special Collections. Their book is scheduled for publication by Stonehouse in the fall of 1991.

**Prof. H.H. Holland** of the Chemistry Department will share a Medical Research Council Grant of \$37,000 for the study of production on inhibitory steroids of the human aromatase enzyme.

## Alumni Award Winners

Sharon Preece

"I think that teaching is a very important part of my job, and appreciate my colleagues and students noting what I have done." Mathematics Professor **Eric Muller** was thrilled to win this year's Brock alumni Award for Excellence in Teaching. The professor is a pioneer in the use of computers to teach math courses for students who are not math majors—80 percent of those enrolled. In addition to mathematics education, Prof. Muller's research centres on transportation scheduling.

'Self-assured', 'Out-going', 'Determined', 'Highly motivated', 'Destined to succeed'...these were the phrases used to describe **Sharon Preece**, the winner of this year's Silver Badger Award and Alumni Association Student Award. The energetic fourth-year student is working towards a combined degree in sociology and Russian, and still found time to create a Brock figure-skating team, be a residence proctor, porter and don, serve as a BUSAC councillor...the list goes on.

Sharon hopes to study at Leningrad State University in the U.S.S.R. After graduation, she would like to be a sports researcher with CBS at the '92 Olympics, then have a career in sports broadcasting or journalism.

## Brock Gets \$650,000 Mass Spectrometer

Brock University has just installed a new mass spectrometer that will enable chemists to identify trace substances more quickly and accurately, for a broad range of scientific and industrial applications.

Purchased with the help of a \$325,000 grant (the largest single research grant ever received by Brock) from the National Science and Engineering Research Council, the \$350,000 spectrometer is the factory prototype of an instrument made in England, of which there are now 30 in the world, and only one other in Canada. Says Professor Jack Miller, "The value of this instrument is about \$650,000; but we saved money by buying the prototype, recycling some parts of our old one, and re-using existing computers." Prof. Miller and his team have been making modifications to the mass spectrometer, and they claim to have increased the sensitivity, for some applications, by a factor of 10 to 50 beyond the manufacturer's specifications.

The instrument will be used for the development of new mass spectrometric techniques, in environmental research to identify dioxins and other contaminants in water, in steroid-related research, and for biological, geological and archaeological identification.

Prof. Jack Miller (far right) and the new Mass Spectrometer

DIVINO MUCCIANTE

## Prof. McEwen Goes Out In Style!

DIVINO MUCCIANTE

With his retirement day approaching, Professor McEwen joked to his family that he would love to take his last trip to Brock in a chauffeur-driven limo. The joke was on him when April 3 arrived ...and so did an elegant Rolls, complete with uniformed driver and a bottle of bubbly!

Dr. Karen Kain, Principal Dancer, National Ballet of Canada

## Honorary PhDs

Receiving Honorary Doctorates at Brock's 46th Convocation were:

- Mr. Justice Brian Dickson**, Chief Justice of the Supreme Court of Canada;
- Dr. Alan Earp**, President Emeritus of Brock University;
- Ballerina Karen Kain**;
- Brigid Pyke**, fourth-term president of the Ontario Federation of Agriculture;
- Archbishop Ted Scott**, of the Anglican Church of Canada.

The honorary doctorates were conferred during the University's convocation exercises, May 30, May 31, and June 1.

## Oops!

A few names were omitted from the donor lists that appeared in our last issue of *Surgite!*. Although we may have temporarily misplaced the donors' names, we assure you we never lost sight of their generous donations!

We apologize for the error, and offer belated recognition of their contribution.

- Taro Building Campaign**
- Alden Construction
  - EBW (Mr. & Mrs. Leo J. LeBlanc)
  - Ernst & Young
  - Group 2 Development Limited
  - B. Newman
  - The Tomarin Family
